NSERC PermafrostNet

News from the Network: who we are and what we are working on
What we want to achieve

**Goal:** Boosting Canada’s ability to adapt to permafrost thaw.

**Objectives:**
1. Quantify and predict permafrost thaw
2. Connect spatial scales
3. Prototype data & knowledge products
Themes connect our research
A network emerges over time

Integration of research outputs toward network-level output and outcomes.

Themes link related projects and connect them with partners.

Individual research projects are established and students recruited.
Network emerges over time

Integration of research outputs toward network-level output and outcomes.

Themes link related projects and connect them with partners.

Individual research projects are established and students recruited.
Expected network outcomes: understanding, methods, experts, community
